

MetalStrike Pro

Vibration Feedback Joystick for PC

Genius
Live with Ideas

Yes! You can also find a vibration feedback joystick in the *MetalStrike Series* as well!

This joystick from Genius, *MetalStrike Pro*, gives you different levels of vibration feedback when flying your planes. In a black-polished design, imagine you are the captain of an airship in Star Wars, *MetalStrike Pro* gives you a different experience in flying games.

The 4-axis function including the rudder is ideal for simulated flight games and can provide Aileron, Elevator, Throttle, and Power controls. It also has 13 buttons, an 8-way "point of view" hat switch, and a Turbo function for auto-repeat so you can fly your aircraft just like a real plane.

An adjustable handle position for comfortable control, three levels of air control to keep your hand cool and dry but also make it exciting when flying.

Captain! Ready to start your mission, hold the *MetalStrike Pro*, and let's go!

Available Now!!

➤ Features:

- Vibration feedback function lets you experience the effects of taking off, landing, stalling, bumps, crashes, etc.
